

Calitate europeana ... Inovatie americana

INDBUS a fost fondat de membrii familiei Queralt din Arbucies, Spania si de familia Castillo din Skopje, Macedonia. Ambele familii au o istorie bogata in industria autobuzelor, datand din anul 1888.

In 2011, familia Castillo a continuat pe cont propriu, cu misiunea de a crea vehicule noi cu accent pe calitate, cercetare si inovatie, in centrul de productie din Macedonia, aflat in curs de dezvoltare.

INDBUS este acum un brand nou, reprojectat pentru a ingloba o gama larga de asteptari si valori individuale dupa o cercetare in detaliu a pietei.

Sa ne bucuram de acest proiect revolutionar si sa profitam de calitate europeana si de inovatie americana.

Prezentare fabrica INDBUS

Noi cream produse inovatoare ce respecta standarde inalte de calitate, care garanteaza o utilizare sigura si confortabila. In fiecare zi, echipa noastra de ingineri cu inalta calificare lucreaza cu scopul de a crea produse complexe, urmarind sa obtina perfectiune tehnica si modernizare constanta. Noi oferim solutii de transport care satisfac cerintele fiecarui client.

Avem capacitatea de a produce atat in serie, cat si modele personalizate. Prin cercetari extinse ale pietei, am identificat elementele cheie de care au nevoie clientii nostri, ceea ce ne permite sa oferim o gama larga de optiuni specializate, avand ca scop satisfactia clientului. Noi va oferim posibilitatea de a va configura autobuzul perfect, in functie de necesitatile dvs.

parte a unitatii de productie

CE VA PUTEM OFERI ...

DIVERSITATE, pentru ca diversitatea inseamna optiuni. Optiuni pentru a obtine exact ceea ce aveti nevoie.

Fiecare model este facut pentru a se potrivi nevoilor specifice ale clientilor nostri.

Din gama noastra larga de optiuni, vom crea o solutie personalizata, care va oferi pasagerilor o experienta de calatorie remarcabila.

Produse standard stoc INDBUS

INDBUS are stocuri in orice moment, ceea ce inseamna ca suntem capabili sa adaptam si sa montam caroseriile noastre pe orice sasiu ales de dvs.

Folosim o structura din otel sau otel inoxidabil si o caroserie formata din GRP (plastic ranforsat cu fibra de sticla) si aluminiu, ceea ce face ca autobuzele noastre sa fie robuste, durabile si usoare. Utilizam materiale de inalta calitate in fiecare etapa a procesului de productie.

INDBUS MAXIMO

Un midibus ce are un design remarcabil,
cu volum de bagaje incredibil, unic in gama lui.

SIGURANTA. Siguranta dvs. este prioritatea noastra. De aceea lucram intens pentru a indeplini toate standardele de siguranta necesare si a ramane la curent cu noile tehnologii pentru a va oferi un vehicul sigur si de incredere.

Accesul cu scaune cu rotile

Lift disponibil

Usor de utilizat, acest lift semi-automat are capacitatea de a ridica pana la 300 kg, fara a compromite insa spatiul de bagaje al vehiculului. Este un produs de top, care ofera cea mai buna solutie de pe piata, permitand versatilitate, maximizarea spatiului pentru bagaje si confort atat pentru pasageri, cat si pentru soferi.

Acestea sunt obtinute prin amplasarea liftului chiar deasupra axei spate, oferind spatiu de bagaje si stabilitate, elemente cheie pe acest segment de piata. Liftul este actionat electric si hidraulic, acest sistem fiind sigur si rezistent, facandu-l solutia ideala care ii permite utilizatorului sa ridice scaune cu rotile de la nivelul solului la nivelul podelei autobuzului.

CONFORT. Scaunele noastre au design ergonomic, sunt create special pentru croaziere lungi si confortabile. Zona de pasageri este echipata cu un sistem de climatizare complet, separat in doua zone (superioara si inferioara), cu sistem de dozare reglabil al fluxului de aer si o iluminare foarte buna in interior.

alegeti-va design-ul dintr-o
selectie de tapiserii de calitate

ASISTENTA SOFER. Display multifunctional modern, cu un design care functioneaza simplu si consecvent prin faptul ca va permite sa selectati si sa afisati ceea ce aveti nevoie, pe un singur ecran integrat, usor de interpretat.
